More quiet and smooth sliding from double ball bearing system, also allows fully access the drawers.

SIDE-2-SIDE

*UTMOST SPACE
UTILIZATION IN
AN INGENIOUS WAY*

By applying the wheel track set with the ERSA cabinets and place it in front of current static cabinets, an unproductive space can be changed to the storage capacity. Up to 88% storage capacity is increased. Comparing to the traditional layout with the new SIDE-2-SIDE system, re-layout will make an additional 43% of floor space for working area or storage area is gained.

STORAGE CAPACITY INCREASES BY 88%

Traditional cabinet system

SIDE-2-SIDE system
About 88% or $\frac{7}{8}$ storage capacity is created.

PRODUCTIVE AREA INCREASES BY 43%

Traditional cabinet system—space usage: 17.6 sq.m.

SIDE-2-SIDE system—space usage: 9.99 sq.m.

01 :

To prevent injury cause from stumble and tumble over the track, supporting foundation between tracks is provided.

02 :

Small interval between front and back row offer better ergonomic posture while user accesses the back row cabinet.

03 :

SIDE-2-SIDE system is designed to be a multi-user system that users can utilize it by two or more users simultaneously. In addition, speedy access to documents or objects, in the front row, can be reach easier than conventional heavy-duty mobile storage system. By sliding aside the mobile cabinets in front row, the static cabinet at the back row can be reach.

STEP TOWARD THE GREEN

It has been over a few years that ROCKWORTH has studied the consequences to the environment caused by our business. The study is conducted not only within our organization but also to our customers, suppliers and other environmental specialists.

We understand the difference of steps toward the sustainable organization and realize that we can only achieve this by working together with everyone in our company. Starting from product design, production through delivery and installation.

In the journey of sustainable business and environmental friendly, we continuously focus on the following development and improvement.

- Our products meet or exceed applicable legal requirements and other requirement related to the environment aspects of the organization.
- We are continuously improving performance focus on preventing pollution, reducing waste and reducing consumption of non-renewable energy.
- We are implementing technologies to efficiently use of energy resources.
- We design, process and produce our products for the environment.
- We promote environmental knowledge and awareness.
